Canotia publishes botanical and mycological papers related to Arizona, or in the case of this issue, research papers by Arizona botanists. These may include contributions to the Vascular Plants of Arizona project, checklists, local floras, new records for Arizona, and ecological and systematic studies. All manuscripts are peer-reviewed by specialists. Acceptance for publication will be at the discretion of the editor. At least 30 printed copies of each issue are distributed to libraries in the United States, Europe, and Latin America. Anyone may download copies free of charge at <http://www.canotia.org>. Back issues are also archived at the Biodiversity Heritage Library (<http://www.biodiversitylibrary.org/>).

Canotia is named for *Canotia holacantha* Torr. (Celastraceae), a spiny shrub or small tree nearly endemic to Arizona. Illustration on cover is same as Fig. 2 in text, drawn by Bobbi Angell.
